

7 Point Container Inspection

The following program is recommended for all shipping containers. It should be implemented at both the point of loading as well as the point of unloading.

1. Outside / Undercarriage
2. Inside / Outside Doors
3. Right Side
4. Left Side
5. Front Wall
6. Ceiling / Roof
7. Floor

Things to look for include, but are not limited to:

Fake walls / support beams

Holes

Repairs

Added compartments
